

# Technology Trends

Yousef Ayman

September 2022

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- The most popular programming languages are web-based one such as JavaScript and HTML/CSS.
- Cloud-based service is getting more relevant
- The most popular web frameworks are React.js, Angular.js and jQuery.
- non-relational databases is getting more relevant.

# INTRODUCTION

---

- About: Analyzing the trends in software development
- Purpose: Identify skill requirements for future.
- What are the top programming languages in demand?
- What are the top database skills in demand?
- What are the top platforms?
- What are the top web-frameworks in demand?
- Is there a gender gap in the tech industry?

# METHODOLOGY

---

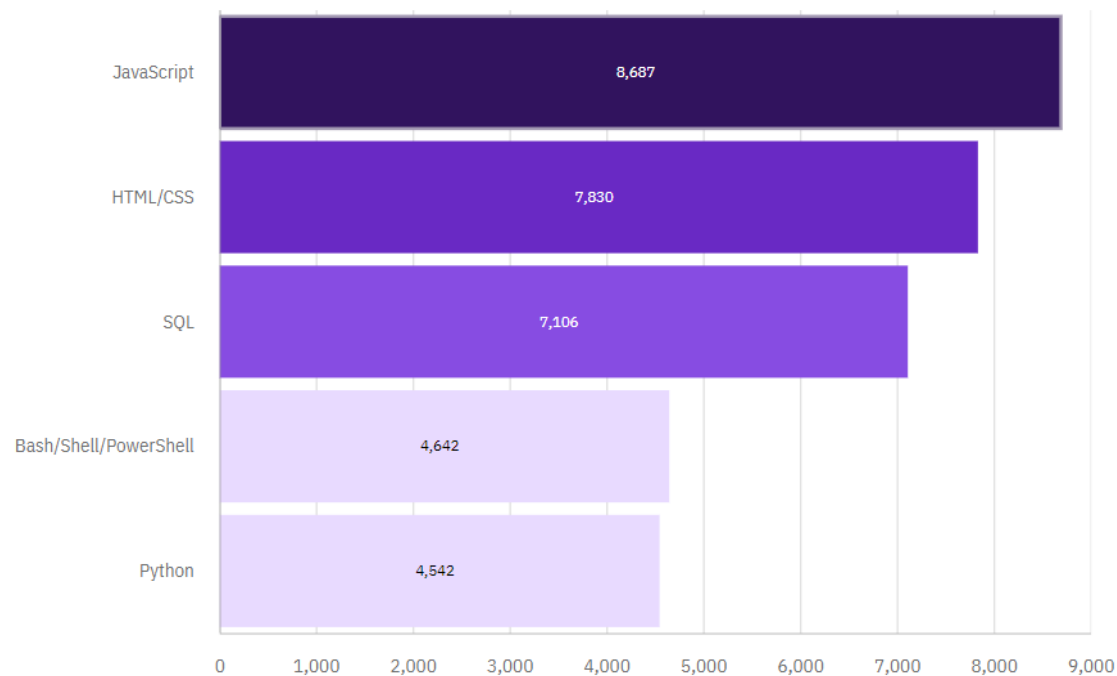

- Data Collection Sources:
  - Stack Overflow Developer 2019 Survey
  - GitHub Job Postings API
- Data Wrangling
- Data Analyzing
- Data Visualization
- Building Dashboard
- Presentation

# PROGRAMMING LANGUAGE TRENDS

## Current Year

Top 5 Programming Languages Worked With

## Next Year

Top 5 Language Desire Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript & HTML/CSS are top programming languages for both current and future trend.
- Python moves from 5<sup>th</sup> position to 3<sup>rd</sup> position.
- PowerShell disappeared from top 5

## Implications

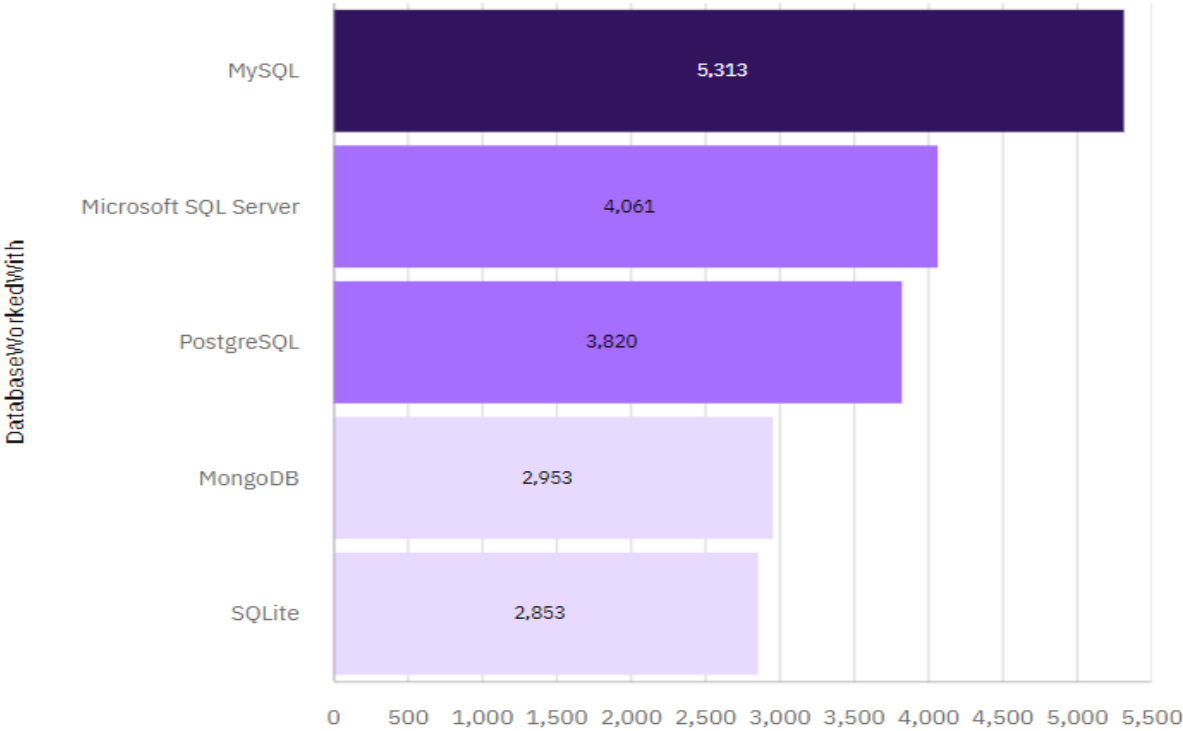

- Web programming languages are still in high demand.
- Python becoming more popular because of the importance of AI and ML
- Scripting languages getting out of interest compared to others

# DATABASE TRENDS

Current Year

Next Year

Top 5 Databases Worked With

Top 5 Database Desire Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MongoDB , PostgreSQL and Redis are getting more popular.
- MYSQL drops from No.1 to No.4.
- MS SQL and SQLITE drops out of top 5.

## Implications

- Open-source database is the most preferable than commercial databases .
- Non-relational database see increasingly usage in the future.
- Relational database still has the leading in the future.
- Redis supports abstract data types.

# DASHBOARD

---

[https://eu2.ca.analytics.ibm.com/bi/?perspective=dashboard&pathRef=.my\\_folders%2FIBM%2Bcapstone&action=view&mode=dashboard&subView=model000001836bb2f9d4\\_0000000](https://eu2.ca.analytics.ibm.com/bi/?perspective=dashboard&pathRef=.my_folders%2FIBM%2Bcapstone&action=view&mode=dashboard&subView=model000001836bb2f9d4_0000000)

# DASHBOARD TAB 1

## Current Technology Usage

Top 10 Languages Worked With

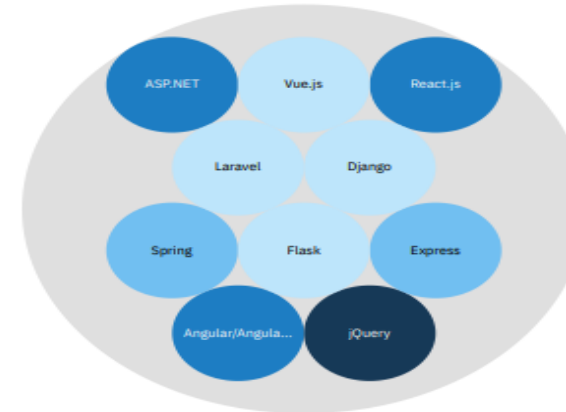

Top 10 Databases Worked With

Platform Worked With

Top 10 WebFrame Worked With

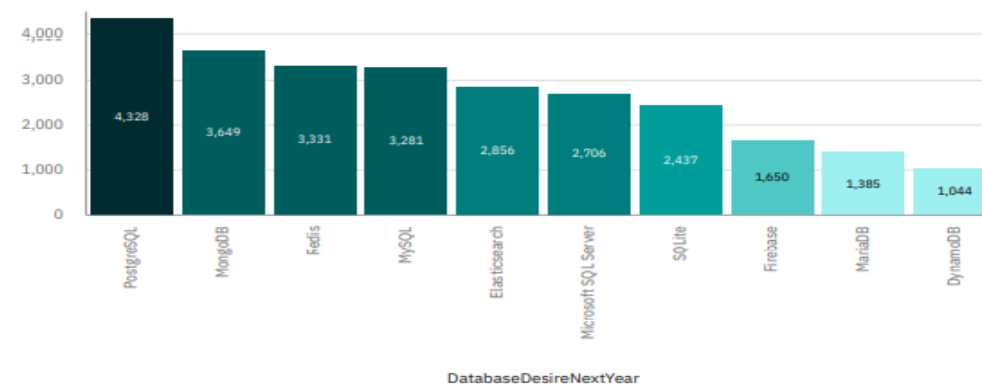

# DASHBOARD TAB 2

## Future Technology Trend

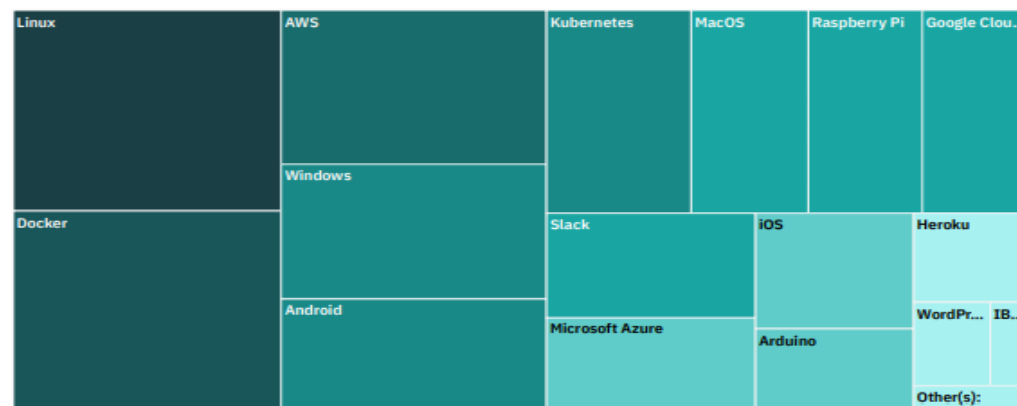

### Top 10 Language Desires Next Year

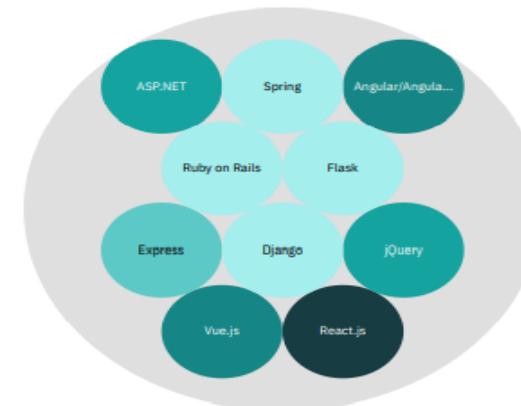

### Top 10 Database Desire Next Year

### Top Platform Desire Next Year

### Top 10 Web Frame Desires Next Year

# DASHBOARD TAB 3

## Demographics

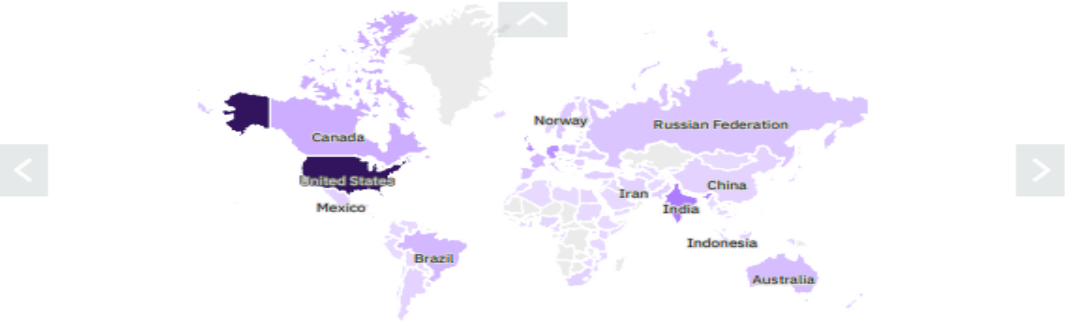

Respondents classified by Gender

Gender  
Woman Man

Respondent Count for Countries

Respondent (Count)  
1 3,127

Respondent Count by Age

Respondent Count by Gender, classified by Formal Education Level

EdLevel  
Associate degree Bachelor's degree (BA, BS, B.Eng., ...) I never completed any formal edu...  
Master's degree (MA, MS, M.Eng., ...) Other doctoral degree (Ph.D., Ed.D., ...) Primary/elementary school

# DISCUSSION

**Respondent Count by Age**

Majority of respondents ages between 24 and 30 this could skew the results for recent technologies.

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- The most popular languages are web based (JS, HTML/CSS)
- The most used upcoming web framework is React.js
- Platforms like Docker and AWS are growing in the future
- Gender gap in tech industry
- Changing in technology every year
- Non-relational database is getting more popular

## Implications

- Web based application is taking over the other application.
- Developers need to be flexible and adjust to rapid changes
- Impact of job hiring
- Shift to faster app deployments and cloud services in future
- More semi-structured and unstructured data is being analyzed.

# CONCLUSION

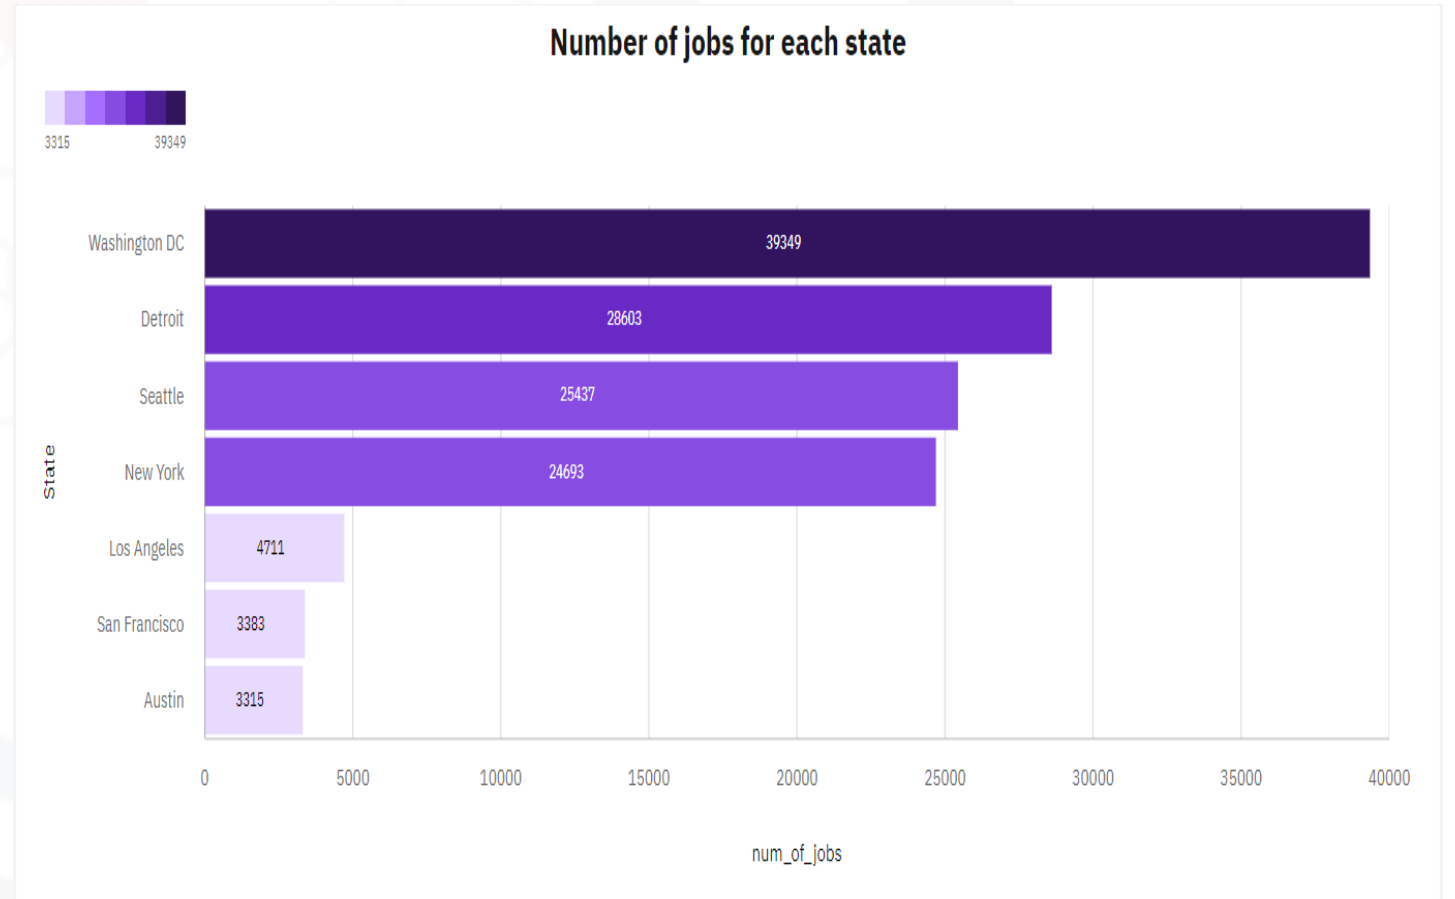

---

- It's important to learn web languages and non-relational database, To stay relevant in the tech industry
- Cloud-based service is the right direction for IT investment.
- Among web frameworks, React.js is the best to learn for the future.
- There is a big gender gap in the tech industry

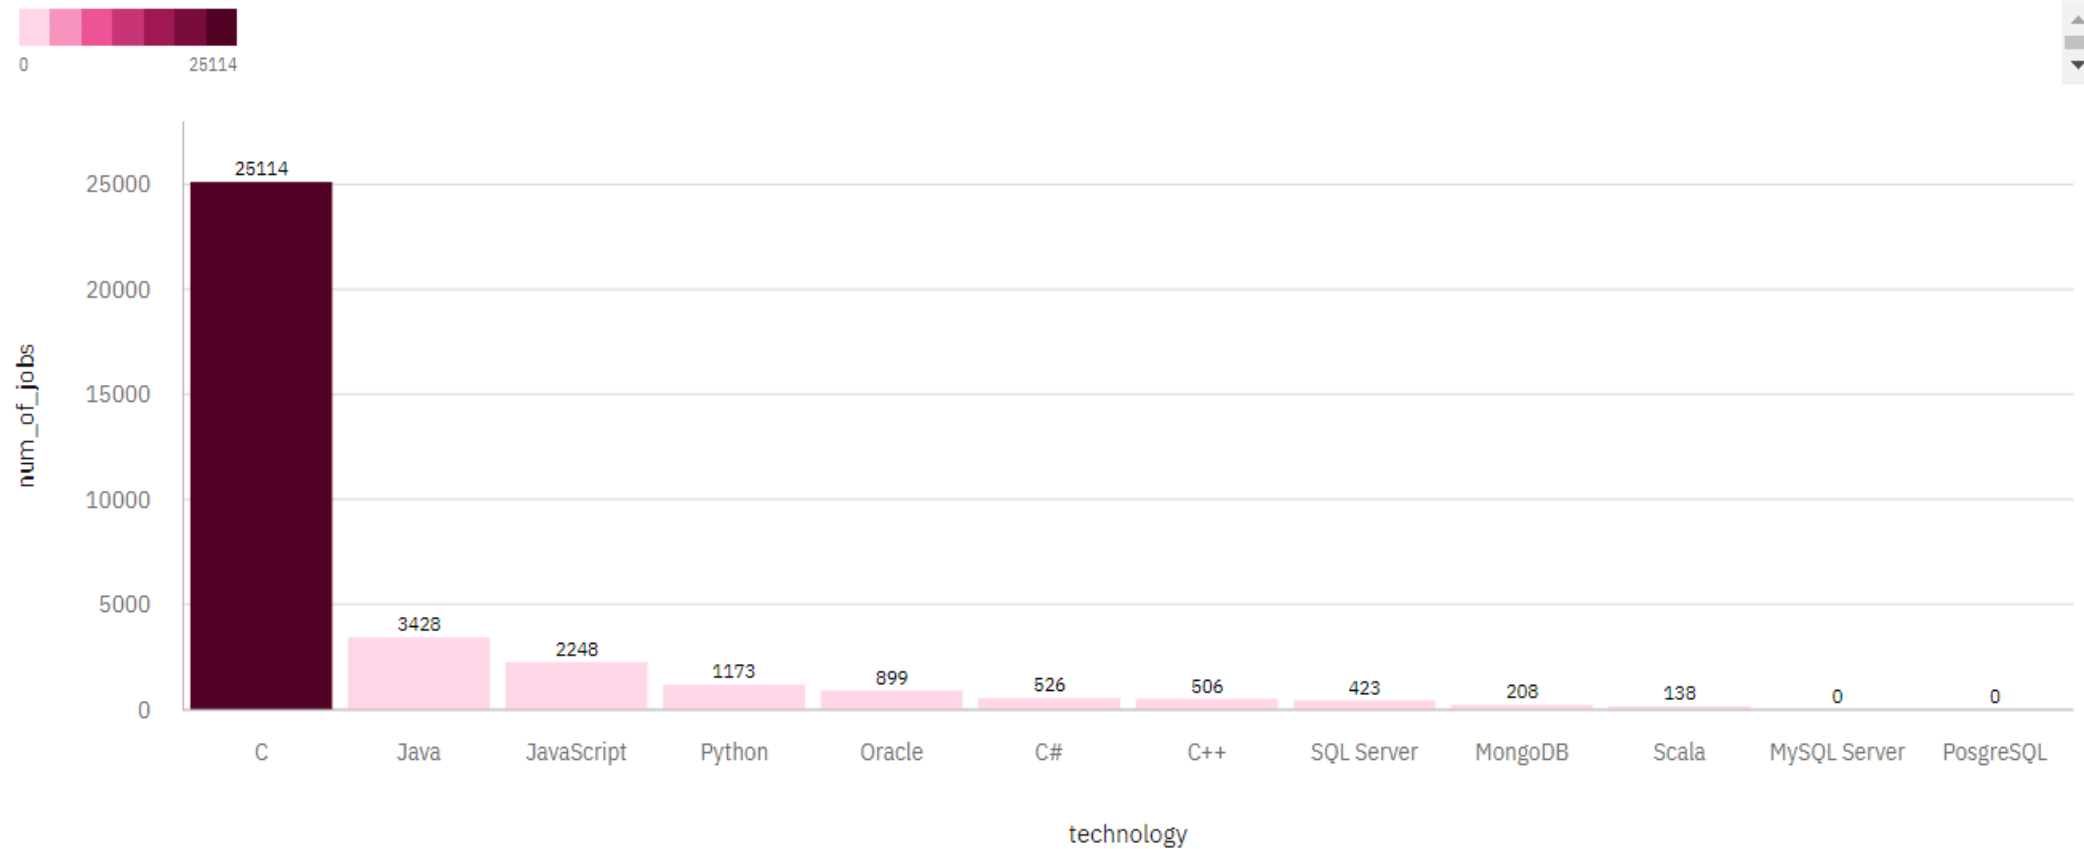

# APPENDIX

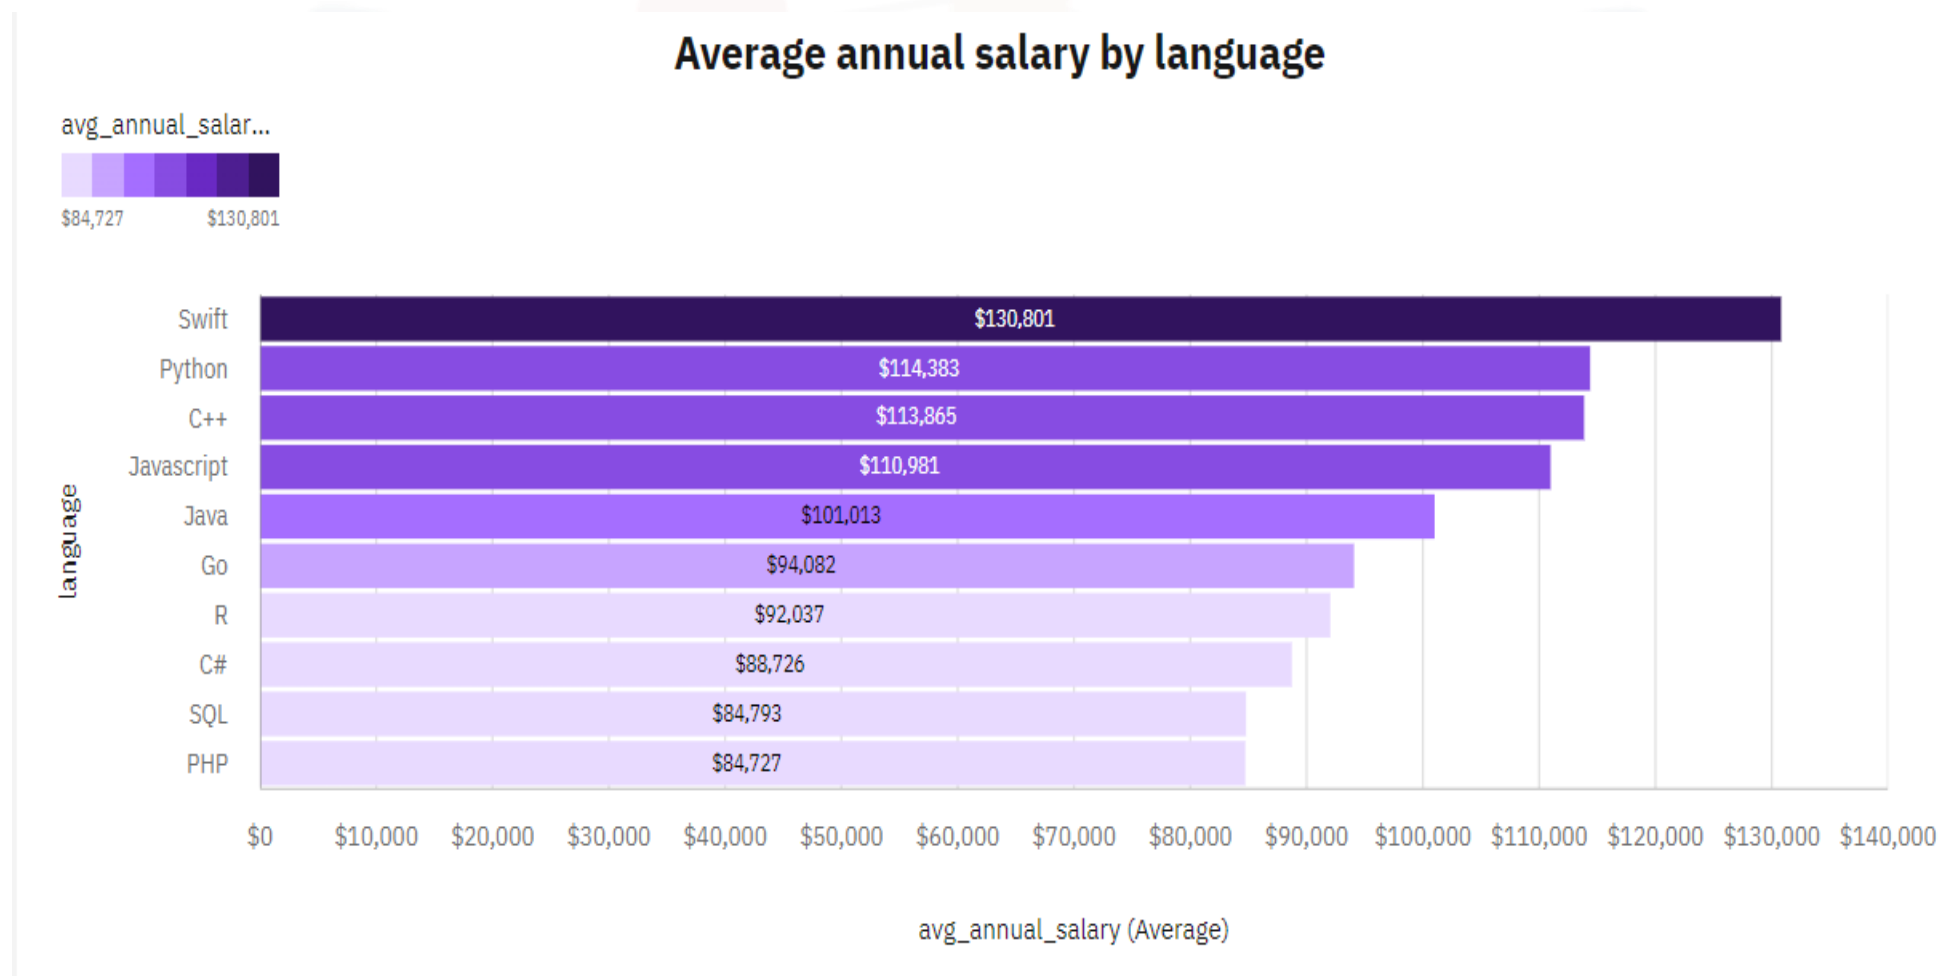

# JOB POSTINGS

Number of jobs for technology in GitHub

# POPULAR LANGUAGES

# Thank you
